PROJECTS

Employee Perfomance Evaluation System

December 2021 - Jan 2022

- Is a simple project that can help a certain company evaluate the performance of their employees based on their task accomplishments. This system has 3 types of users which are the Admin, Employee, and Evaluator. The Admin Side is the system user that in-charge to manage the important data of the system such as the department, designation, employee list, and list of evaluators. The admin has access to all of the data stored and the database. The Employee side is the system users that can only access the tasks where they are assigned and submit their progress. The submitted progress of the employee in each task will be the reference of the evaluators on how they will rate the employees. The Evaluator side is the system user side that evaluates the performance of the employees' every task. They will evaluate the employees' by their efficiency, timeliness, quality, and employees' accuracy to accomplish a certain task.

Product Waste Reduction

Ongoing Project

- is a system that will dynamically optimize prices to the products in stock that are about to expire and give notification to the owner of the store for approval and also will be checking products on low demand and optimize their prices as well.
- The system after careful analysis has been identified to be presented with the following modules: The modules involved are: • Admin • Store keeper/warehouse manager • Notification • Report • Authentication
